HOW TO MEASURE ROUGH OPENINGS FOR WINDOWS and DOORS

How to measure a ROUGH OPENING for replacement Windows. Always measure the width first, and then the height of the opening. Sanctuary Windows are custom-made, this rough opening measurement is for "INSTALLATION" purpose only.

Step 1 – Outside OPENING WIDTH – Assign a Number to Windows, Room Location and Opening Measurements.
To get the WIDTH measure (Horizontally) from left to right. Measure drywall to drywall or jambs to jambs on both sides.
Step 2 – Outside OPENING HEIGHT
To get the HEIGHT measure (Vertically) from top to bottom. Measure drywall to drywall or head to windowsill on both sides.
Step 3 – Scroll down select window or door model.
Step 4 – PRINT or COPY PAGE 6 IMPACT SUMMERY LIST
